SPECIAL TREE LIST, NOVEMBER 1941.

These trees are not listed in the regular price list. Each tree is numbered.

Please order by number.

Every chestnut tree here listed is a bearing tree. The Zimmerman chestnut is a very ^{erect} great grower.

Trees in this list are priced with ball of earth and waxed trunk f.o.b. cars Purcellville, Va. For freight rates see appended price list.

If you desire to test varieties in your situation a crooked tree will do as well as any.

If you have a yard situation in which a tree will be seen chiefly from one side a tree marked S.C. (slightly crooked) may do as well as any, and it will straighten gradually as it grows.

Trees with ball of earth can be planted perfectly even if the ground is frozen a little.

Suggest that you send your order promptly. Suggest you make alternative selection in case trees of your first choices have already been sold.

Occasionally in digging a tree we find that its roots are all on one side, or there may be a stone, so that we cannot make a satisfactory ball of earth. In that case we will do our best to select an approximate duplicate if there is one. Otherwise we will return your money.
